

The Future of Self-Custody Starts Here

[View Website](#)

Problem Statement

Every Year

15%

of crypto users lose access to their wallets due to forgotten or misplaced seed phrases

- Chainalysis reports that over **\$140B** in crypto is permanently lost due to inaccessible wallets.
- DeFi users, NFT collectors, and first-time investors are most affected.

Problem Statement

Today's solutions are either:

#01

Outdated
(paper backups)

#02

Overly technical
(hardware wallets)

#03

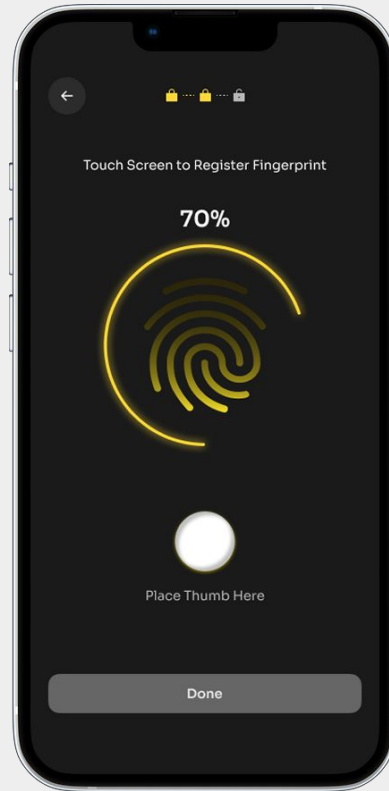

Centralized (password
managers)

None of them are built for a world where millions of people are onboarding into self-custody for the first time.

Solution

K33P replaces the vulnerability of handwritten seed phrases with a zero-trust vault.

Built on Cardano's UTXO model, known for its unmatched security and decentralization.

By using:

- Advanced encryption
- Biometric security
- Decentralized identity signature
- Zero-knowledge proofs

K33P lets only you access and restore your seed phrases, even if your device is lost.

Solution – Product Overview

Self-sovereign security

User-controlled, with no third-party access, not even K33P.

Biometric authentication

Eliminates the need to remember passwords or store physical copies

Zero-Knowledge Proofs (ZK Privacy)

Ensures full privacy and regulatory compliance

Decentralized storage architecture

Eliminates single points of failure

Seamless recovery

Simplifies the process without security compromises.

\$11billion

K33P follows a freemium strategy:

01

Free tier:

Basic storage &
recovery of 2
wallets

02

\$3.99(~~¥~~5,999)/monthly
Premium:

Inheritance
plans, advanced
features

03

Enterprise API for
wallets & dApps:

Custom
integration
pricing

Market Size

TAM
\$50B

crypto security
market by 2026

SAM
\$20B+

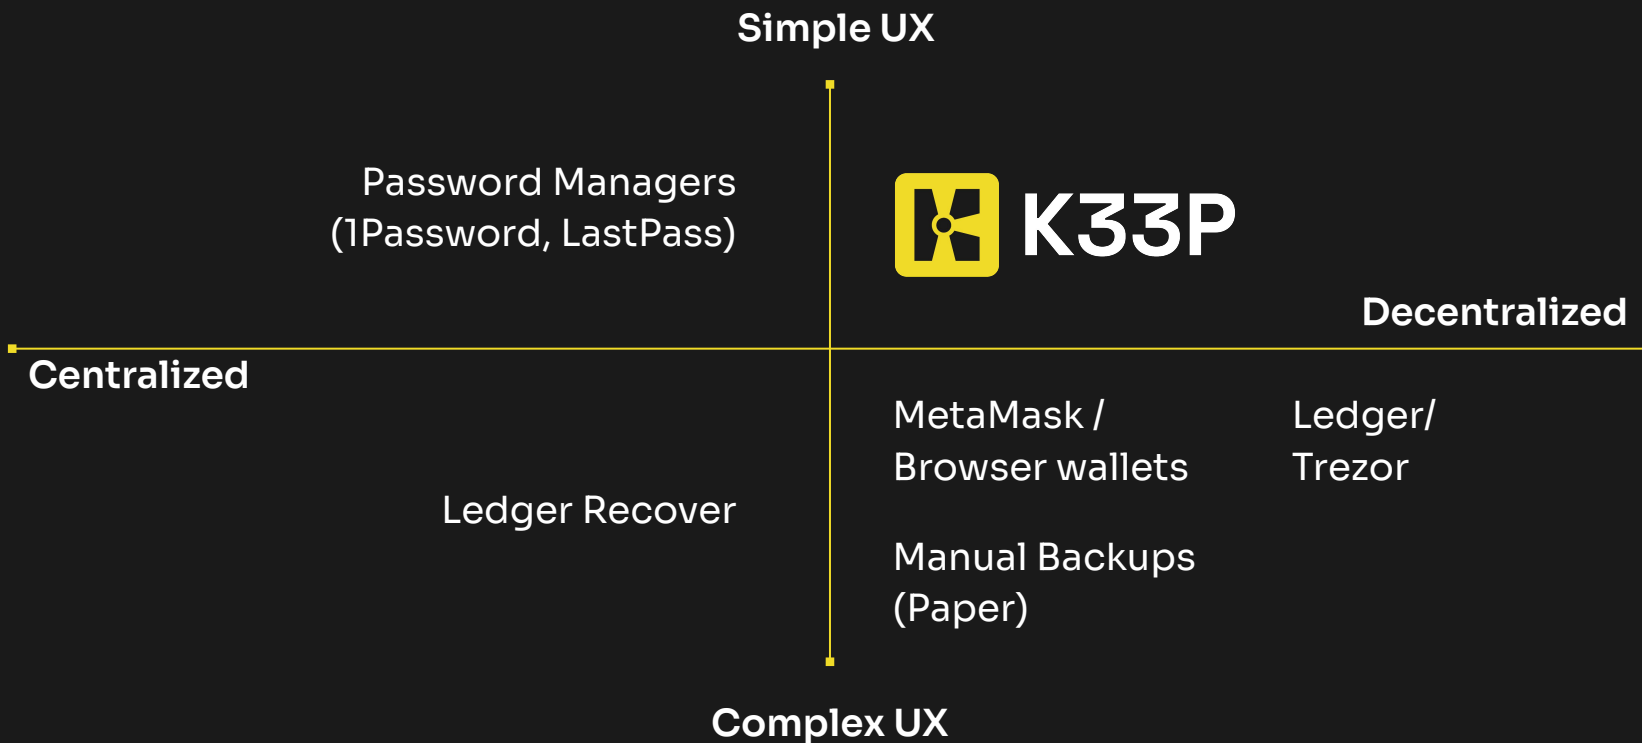

mobile-first users
in self-custody

SOM
\$500M

K33P's obtainable
market in 3 years

Our 3-year projections cover the first 2% of our SOM. We are positioned to grow through enterprise APIs and custom integrations.

Competition Landscape

Meet the Team

We're a team of dedicated builders with deep roots in crypto infrastructure, UX design, smart contracts, and digital branding. We've all lost access to something before, we're building K33P so no one else has to.

We are raising seed round of

\$120,000

Expected Outcomes

- MVP launch → 5K users (Month 3).
- Scale to 200K users, \$1.4M ARR (Month 15).
- Enterprise readiness → \$15M ARR (Year 3).

What is Next For K33P

01

Mobile App Launch

Rolling out access to early users, followed by full launch on iOS and Android.

02

Global Payments

Bridge-powered checkout for seamless subscription in any currency.

03

Strategic Partnerships

Collaborations with crypto platforms and investors to grow adoption and secure funding.

04

K33P Verse Building

Introduce evolving avatars, new Locals, mascot identity, and deeper story arcs in the K33P Verse.

**Your Crypto.
Your Control.
Always.**

Thank you.
